label**

Approx. days to:

Germinate: Up to 8

Harvest: Up to 150

How to plant

Sow indoors

Apr - May

Plant/sow outside

May

Harvest

Sep - Oct

Do not plant outside until risk of frost has passed. For an earlier harvest, start growing indoors 4-6 weeks before transplanting.

1. Remove the lid completely.
2. Choose a sunny spot.
3. Simply push the seed pod into loosened soil or compost (growing bag or large pot filled with Miracle-Gro Enriched Compost) until the pod is level with the soil surface. **DO NOT** cover, the seeds are at just the right depth to grow.
4. Space seed pods 90cm apart.
5. Water daily.
6. If more than one seed germinates remove all but one when they reach 5cm tall.
7. Feed every 7-14 days with Miracle-Gro 'Gro Your Own' when fruit is visible and foliage colour fades.
