- For best results treat small weeds at an early stage of growth and apply in warm, dry conditions (MAR-OCT).
- Spray at any time when the weeds are actively growing and have adequate leaf area to absorb the spray.
- A repeat treatment may be necessary if rain or drought conditions are expected.
- Apply in calm conditions to avoid drift onto cultivated plants.
- Treated areas can be re-planted/re-seeded a day after treatment.
- Maximum number of treatments: 4 per year.

WHERE TO USE

- For use on unwanted vegetation and areas not intended to bear vegetation.
- Controls most weeds around the garden, e.g. gravel areas, paths, drives, hard surfaces, patios, tarmac, along fences and for edging lawns.
- Can be used to clean up weedy ground before planting vegetables, flowers, bushes and trees, and to renovate overgrown areas.
- Do not use on lawns or other plants you want to keep.

HOW TO USE

As good practice, we recommend wearing waterproof gloves and gardening footwear.

- 1 Press and hold the tab on the top of the sprayer, twist nozzle 1/4 turn to spray position.
- 2 Hold the sprayer approx. 50cm away from the target weed and spray to lightly wet the weeds - avoid run-off.
- 3 Rotate the nozzle back to 'STOP' position after use.

- 1L to treat 30 m². Apply at no more than 100 ml/m².
- Repeat treatment if necessary after a minimum of 14 days where re-growth occurs.
- Allow the spray to dry before walking or playing on treated areas.
- Treat established weeds before the start of flowering.
- Spray nettles and ground elder when new leaves have unfolded fully in late spring.
- Weeds may show first visible results within an hour of spraying, depending on weather conditions and the type of weed.
