

HOW TO USE

Our peat free multi purpose compost is ideal for many gardening uses. Perfect for pots and containers, beds and borders, and hanging baskets too. It has been specially developed, containing essential plant food for **4 weeks**, to give your plants a great start.

We strongly recommend using Levington® Ericaceous compost for acid loving plants like Azaleas, Rhododendrons or Heathers and Levington® Seed and Cutting compost for the youngest plants and seeds.

CONTAINERS

1. Ensure the container has sufficient drainage holes, then fill with compost.
2. Add your chosen plants to the container.
3. Firm lightly around the plants and water thoroughly.

HANGING BASKETS

1. Line the basket if necessary and part fill it with compost.
2. Insert plants through sides of the basket where possible to ensure a ball of colour.
3. Fill the basket with compost and arrange plants on the top with trailing ones around the sides.
4. After everything is planted, firm lightly and water thoroughly.

BEDS AND BORDERS

1. Water the plant thoroughly.
2. Dig a hole twice the size of the root ball.
3. Part fill the hole with equal quantities of compost and soil.
4. Make sure the plant is at the same level above the ground as in the original pot, firm lightly.

USEFUL TIPS

- Peat free will look and feel different. We recommend that you check before watering using the 'finger test'. Pop your finger about 3 cm into the compost. If it is dry, get watering, if not, wait a bit longer
- For the best results it's recommended to start feeding earlier. If leaves start to pale this is a sign to start feeding, and we recommend using Miracle-Gro® Plant Food.
- Try to avoid compost in pots drying out, and don't let them sit in water either, roots don't like being waterlogged!
- Sometimes you might see some white mould on your compost. This is not harmful to your plants and will disappear naturally.

HEALTH, SAFETY & STORAGE ADVICE

- Use in a well ventilated place and avoid breathing in dust.
- Wash hands after use.
- Open bag carefully and reseal after use.
- Keep the bag closed when in storage to prevent drying out.
- Storage from one year to another may affect performance.
- Store in a cool place, away from direct sunlight.
- Keep away from pesticides.

HOW IT WORKS

Balanced nutrient levels

Contains an **optimal balance** of nitrogen, phosphate, potassium and trace elements for **4 weeks' feed**.

For stronger, healthier roots

Superior texture enriched with optimal level of phosphate promotes the growth of stronger roots. The compost texture also provides the **ideal drainage system** which prevents excess moisture.

For use all around the garden

For multiple gardening uses from potting small plants to planting large containers and beds and borders. Essentials Peat Free Multi Purpose Compost by Levington® contains essential plant food for 4 weeks, to give your plants a great start.

OUR STORY

Established in 1967, Levington has been providing expertise, research and innovation into compost for over 50 years. When it comes to compost, Levington has been the gardener's choice for decades.

At our officially recognised research station in Levington, Suffolk, we are constantly innovating and testing for the best combinations of ingredients in compost to ensure your plants are strong and healthy.

PEAT FREE

We are dedicated to protecting the environment and this compost is **100% peat free**.

Working with peat free composts is different to peat composts, however you can still achieve fantastic results. Going peat free is better for the plants and the planet.

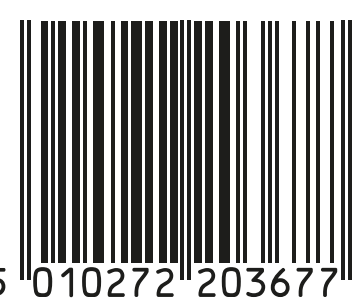

We are actively working on improving the responsible sourcing profile of our compost mixes year on year. Levington® compost contains forest by-products, carefully processed to help you grow plants that improve your environment and make the world a more beautiful place.

We have helped restore **3000 hectares of peatland** over the last 30 years, the equivalent of 5606 football pitches!
