## HOW TO USE

**PLANTING** Shake the bag to distribute the contents. When only planting two plants use the end panels. Delay planting tomatoes until the first flower opens.

**WATERING** After planting, water in using about 6 litres (approx. 1.5 gallons), and then water as necessary to keep the bag moist.

For more information please scan the QR code.

CROP	WHEN TO START FEEDING	FEED WITH TOMORITE®
Tomatoes – under glass	The fruit on first truss is pea sized	Once a week
Tomatoes – outdoor	The fruit on second truss is pea sized	Once a week

Tomorite® planter can also be used for growing peppers, aubergines, melons, courgettes, marrows and cucumbers.  
\*when fed with Tomorite® Liquid Tomato Food.

## FROM THE MAKERS OF TOMORITE®

## OUR STORY

Established in 1967, Levington has been providing expertise, research and innovation into compost for over 50 years. When it comes to compost, Levington has been the gardener's choice for decades.

At our officially recognised research station in Levington, Suffolk, we are constantly innovating and testing for the best combinations of ingredients in compost to ensure your plants are strong and healthy.

## PEAT FREE

**We are dedicated to protecting the environment and this compost is 100% peat free.**

Working with peat free composts is different to peat composts, however you can still achieve fantastic results. Going peat free is better for the plants and the planet. We are actively working on improving the responsible sourcing profile of our compost mixes year on year. Levington® compost contains forest by-products, carefully processed to help you grow plants that improve your environment and make the world a more beautiful place.

We have helped restore **3000 hectares of peatland** over the last 30 years, the equivalent of 5606 football pitches!
