TOUGH WEED CONTROL

CONCENTRATE

MAPP No: 20876
PCS No: 07247

WHY CHOOSE WEEDOL® TOUGH WEED CONTROL?

- ✓ **TOUGH WEEDKILLER, KILLING PERENNIAL AND BROAD LEAF STUBBORN WEEDS IN THE GARDEN**
- ✓ **KILLS TO THE ROOT**
- ✓ **PREVENTS REGROWTH OF WEEDS**

INSTRUCTIONS FOR USE

FOR USE ONLY AS A HOME GARDEN LAWN WEEDKILLER. READ ALL SAFETY INSTRUCTIONS BEFORE USE. Keep children and pets away from treated areas until dry. To avoid drift, do not apply in windy conditions.

Maximum individual dose: 50 mL product per 25 m².

Maximum number of treatments: 2 per year.

WHEN TO USE

Use on leafy weeds April – September, when they are small, are actively growing and the soil is moist. • For best results following spraying, do not cut the grass for at least 1 day after treatment. • Avoid spraying in drought or frost. • To avoid drift, do not spray in windy conditions. • DO NOT USE ON NEW-SOWN LAWNS FOR AT LEAST 6 MONTHS AFTER ESTABLISHMENT. • Re-treatment may be necessary for well established difficult to control weeds. • Allow an interval of at least 6 weeks between treatments. • **Maximum 2 applications per year.**

WHERE TO USE

For use on lawns. Kills perennial and broad-leaved weeds including dandelion, plantain, common chickweed, thistle, nettle and bramble. Doesn't kill the lawn. Targets to the root to prevent re-growth.

HOW TO USE

SHAKE WELL BEFORE USE AND USE MIXTURE IMMEDIATELY.

Wear gloves and enclosed footwear.

1. Use either a clean garden sprayer or watering can fitted with a fine rose.

2. Mix well before use. Loosen measure cap slightly, gently squeeze bottle until required volume is achieved. Apply Weedol® Tough Weed Control Concentrate at rate of 50 mL in 5 litres of water to cover 25 m² covering vegetation evenly.

3. Hold the sprayer or watering can rose approximately 20 cm away from the target weed and lightly wet the weeds - avoid run-off. For the majority of weeds a single spray is sufficient. Direct away from ponds and other surface water bodies.

4. Wash hands after use. Wash equipment thoroughly after use.

CAUTION

The first 4 mowings of treated grass must be composted for 6 months before use as a mulch. Scorching of grass can occur if more than one squeeze is applied to a given area. Control may be reduced if rain falls within 24 hours of application.
