TOUGH WEED CONTROL READY TO USE

- ✓ **TOUGH WEEDKILLER, KILLING PERENNIAL AND BROAD LEAF STUBBORN WEEDS IN THE GARDEN**
- ✓ **KILLS TO THE ROOT**
- ✓ **PREVENTS REGROWTH OF WEEDS**

INSTRUCTIONS FOR USE

FOR USE ONLY AS A HOME GARDEN LAWN WEEDKILLER.

WHEN TO USE

Use on leafy weeds April – September, when they are small, are actively growing and the soil is moist • For best results following spraying, do not cut the grass for at least 1 day after treatment • Avoid spraying in drought or frost • To avoid drift, do not spray in windy conditions • **DO NOT USE ON NEW-SOWN LAWNS FOR AT LEAST 6 MONTHS AFTER ESTABLISHMENT** • Re-treatment may be necessary for well established difficult to control weeds • Allow an interval of at least 6 weeks between treatments • **Maximum 2 applications per year.**

WHERE TO USE

For use on lawns. Kills perennial and broad-leaved weeds including dandelion, plantain, common chickweed, thistle, nettle and bramble. Doesn't kill the lawn. Targets to the root to prevent re-growth. This pack treats up to 250 m².

HOW TO USE

SHAKE WELL BEFORE USE. Wear gloves and enclosed footwear. **Always ensure the container is stored and carried upright when not spraying.** **Maximum application rate:** 500 ml product per 25 m². When spraying large areas it is easier to mark out and measure the areas before application. Apply on a calm, dry day when there is no risk of spray drift onto adjacent desirable plants.

1. Remove Power Sprayer from side clip. Remove protective strip from battery compartment to activate. Unwrap plastic cover around hose. Pull out the red connector.

2. Insert red connector into the top of the cap and click in place. Press and twist the cap anticlockwise to 'ON' position (½ of a turn).

3. Flip open the Power Sprayer and lock into position. Twist nozzle to select spray setting. Hold the sprayer approx. 20 cm away from target weed and spray weeds evenly to lightly wet leaves, avoiding run-off. For the majority of weeds a single spray is sufficient.

4. After use, press and twist the top of the cap clockwise to the 'OFF' position.

5. Squeeze Power Sprayer trigger to empty nozzle. Turn nozzle to 'OFF' and replace sprayer in the holder without disconnecting the red connector.

CAUTION

The first 4 mowings of treated grass must be composted for 6 months before use as a mulch. Scorching of grass can occur if more than one squeeze is applied to a given area. Control may be reduced if rain falls within 24 hours of application.

Replacing the batteries: Open battery compartment at the bottom of Power Sprayer, remove the used batteries and dispose of safely. Replace with four new AA batteries in the correct position as marked inside the battery compartment. Securely close battery compartment door. Never mix alkaline, carbon-zinc or rechargeable batteries.

Contains Mecoprop-P 3.75g/l (0.375%w/w) and Dicamba 0.4675g/l (0.0467% w/w) as the Potassium Salt as a ready to use solution.
